Dear Shirlene

Thank you for your letter dated 19th February 2015 regarding broadband coverage in and around the Dunster area.

Apologies for the delay in responding, due to the number of parishes covered by the Dunster Area Panel it has taken longer than had been expected in order to draw the information together. The following table I hope should provide you with an understanding of the rollout plans in and around the Dunster area.

You will see that in some instances cabinets can cover multiple Parish areas. Please also note that go live dates are subject to change.

For future reference I have included a link to the Connecting Devon and Somerset interactive map which provides details of coverage across the whole Connecting Devon and Somerset geography, and from your perspective the Dunster area. The Connecting Devon and Somerset Map is updated monthly so should you wish to track developments as and when they happen you can.

I note your request for the exact locations of cabinets, unfortunately the locations of cabinets is something that BT considers as commercially sensitive; therefore, I am not able to provide you with this information.

I hope this outline is helpful to you. If you would like to discuss this further please contact Matthew Ballard, Connecting Devon and Somerset Officer, on MDBallard@somerset.gov.uk or 07919 540906.

Yours sincerely
